

## PolyCube-R

Thermal Cycling made simple.

PoluCube-R is a thermal Cycler based on PCR (Polymer Chain Reaction). PolyCube is a simple and cost effective method to amplify DNA rapidly with high sensitivity under an isothermal condition.

### Key Benefits

- Compact size - easily fits on your existing lab bench
- Easy to use controls with an APP on your Android Phone
- Optimized Block design performs efficiently
- Heated lid up to 100 degrees.

### Specifications

- Model number: PLY-1.0-0000
- No. of wells – 16
- Sample volume - 10 - 100 microliters
- Temperature range - 37-99 deg C
- Weight - 1250 g
- Dimensions – 160mmLx170mmWx160mmH
- Accuracy: +/- 1 deg temperature-controlled amplification
- Power supply- 12 V 5Amps

1 Year  
Warranty
